

A successful year

Working together for a climate-friendly future: Green share rises to 46%

The SPIE Group can look back on a successful 2022. Our outstanding performance with organic growth of 6.9% reflects the growing demand for solutions for a net zero economy. Revenue in 2022 was € 8.1 billion, of which 46% was green according to the EU taxonomy.

OUTSTANDING PERFORMANCE: SPIE SURPASSES € 8 BILLION IN REVENUE

The SPIE Group announced its results for 2022 on 10 March 2023. 'Our outstanding performance in 2022 saw SPIE exceed € 8 billion in revenue and half a billion EBITA marks. SPIE has once again demonstrated the strengths of its business model. Organic growth has been accelerating throughout the year, reflecting our unique position as a key enabler for the energy transition,' said Gauthier Louette, Chairman & CEO of the SPIE Group.

SPIE DEUTSCHLAND & ZENTRALEUROPA: HIGH DEMAND FOR GREEN SERVICES

SPIE Deutschland & Zentraleuropa looks back on a record year for orders. There is especially high demand for technical facility management services, energy efficiency solutions and services that grow the share of renewable energy sources (solar and wind energy) in the energy mix. Digitalisation projects in the healthcare sector and projects for the logistics industry are also seeing increasing demand. As a result, the company saw organic growth of 5.0% in Germany. We also had strong organic growth in Austria and Central Europe, especially in Poland.

'We have a lot of incoming orders and our bid pipeline is full, so we're off to a good start in 2023 and are very pleased by our customers' trust and satisfaction. With our technical services for a climate-friendly and digital future, we're outstandingly positioned as a strong partner to develop solutions for meeting the challenges of our times. Looking back on last year, we see that our positioning paid off. In spite of all the challenges like the war in Ukraine, persistent supply bottlenecks and high inflation, SPIE Deutschland & Zentraleuropa had a successful year in 2022,' said Markus Holzke, Managing Director / CEO of SPIE Deutschland & Zentraleuropa.

46% GREEN SHARE: CONTRIBUTION TO EU CLIMATE TARGETS

Climate protection is SPIE's core business. We demonstrate our commitment through annual audits according to the EU taxonomy, which measures a company's contribution towards achieving EU climate targets. SPIE has been audited according to these criteria since 2019 and has been improving steadily, from 35% in 2019 to 46% in 2022. Our goal is to reach 50% by 2025 and make a substantial contribution to limiting climate change.
